

NOW FITTED IN OUR OFFICE

Finally, a pillow that *measures up*

Introducing the Pillowwise custom-fit pillow

A one-size-fits-all pillow doesn't work. Just like shoes, your pillow should be sized to fit you. Pillowwise pillows are developed by physical therapists and use a patented three-measurement algorithm to align your cervical spine and relieve neck and shoulder tension.

5,000+ healthcare professionals worldwide trust Pillowwise

How we find your fit Three measurements, taken here in the office. It takes just a few minutes.

MEASURE 01

Shoulder width

Outer edge of one shoulder to the other.

MEASURE 02

Neck circumference

All the way around the base of the neck.

MEASURE 03

Neck height

Behind the ear straight down to the shoulder.

We also factor in your **preferred sleep position** — side, back, or stomach — and your **mattress firmness**. Those inputs feed the patented algorithm that matches you with your ideal pillow.

Your color is your size Six colors, each a different core height and firmness. Your measurements pick the one that's yours.

PINK

ORANGE

GREEN
